**COMMENTS:**

Direct the nozzle towards the glazed work surface. Hold the can approximately a hands length above the glazed area and spray until the glazed area has been completely covered. Work on a small area at a time. Leave the spray to soak in for approximately 2-4 minutes. Use a soft cloth in a circular motion with a firm action to remove the glaze. Please do not use any form of scourer or abrasive to remove the glaze. Any dense areas of glaze may require a second application of Glaze remover in order for it to be completely removed. Protect surrounding surface area, and perform a test before use.

**NOTE**

Food Colours used in product conforms to the specifications for food additives in Commission Regulation No 231/2012.
